# New nuclear weapons in Europe?

**26 SEPTEMBER: INTERNATIONAL DAY FOR THE TOTAL  
ELIMINATION OF NUCLEAR WEAPONS**

We will take action against the new nuclear weapons in Europe in the weekend of September 26. The Netherlands, Germany, Belgium, Italy and Turkey belong to the "nuclear sharing states" and are (still) hosting nuclear weapons for the US. For this reason 20 atomic bombs are still stored at the airbase of Volkel (Netherlands) and Büchel (Germany).

The US bombs in the nuclear sharing states are probably getting replaced by new (and more dangerous) bombs with more capacities. However, opinion polls show that a majority of the citizens are against the nuclear weapons in their country and want their government to sign the TPNW.

In the weekend of September 26, Dutch and German students will therefore cycle from Düsseldorf to Volkel, to take action against the modernization of the nuclear weapons in Europe and to let their voices be heard!

**Come to Volkel & join us: hope to see you there!**
